Can you explain your reasoning for those votes?

What changes made in the conference committee version addressed your concerns?

HB0092 – Registered Sex Offenders Holding Public Office

You voted against HB0092, which prohibits registered sex offenders from holding certain public offices.

What concerns led you to oppose this bill?

Do you believe registered sex offenders should be eligible to hold elected public office? If so, under what circumstances?

SF0133 – Protection of Parental Rights Amendments

As a sponsor of SF0133, what were your goals for the legislation?

The bill ultimately failed to become law when you laid it back during the last day that this bill could be introduced. Were you at any time threatened by anyone if you moved forward with this bill?

Why did your position on the bill change during the legislative process? If so, why?

Public records indicate your husband, Nathaniel James Brennan, is listed as an active lifetime registrant on the Wyoming Sex Offender Registry as well as in Florida.

Did that circumstance present any personal ethical considerations for you when voting on legislation involving registered sex offenders?

Has this information at anytime been used as coercion against you by anyone you know, any elected member, lobbyist group or association?

Did you seek guidance from Legislative Service Office staff, legislative leadership, or legal counsel regarding whether any disclosure or if recusal was appropriate?

Is there anything else you would like voters to know about these votes or the reasoning behind them?

Thank you for your time. If you wish to provide additional context or supporting documents, or would like to add anything else, please let me know and I can make sure to include anything that is needed.

Sincerely,

[redacted]
